DATA SHEET

SAFETY BARRIER

STOP MOV'

1

34 Kg/piece

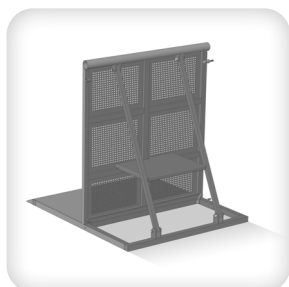

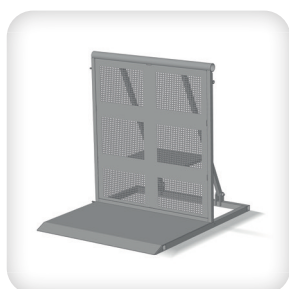

5'

**MODULAR
CUSTOM-MADE**

*Long lasting
and Robust*

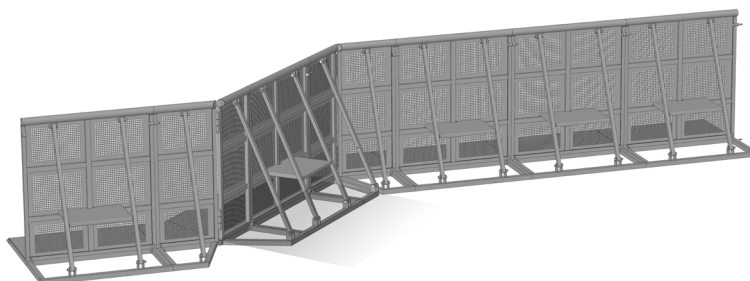

> **STOP MOV'** are the safety barriers for crowd control during your concerts, festivals, exhibitions or public events.

Withstanding **up to 300kg of horizontal push** on the upper boom, it has a **non-slip plate** at the front for keeping the public safe, and a **running board** at the back for an agent who thus has a perfect surveillance position.

Standard or custom-made modules, our elements are designed to be **mounted in a few minutes** fitting very easily into the configuration of your indoor or outdoor environment, whatever the event.

Their flat storage on a trolley which can take 8 safety barriers makes their handling easy.

3 finishes available for **STOP MOV'**: lacquered steel or either lacquered or uncoated aluminium 6060.
